19 Stoke Road
Nayland
COLCHESTER
CO6 4JD

Energy rating

E

Valid until

5 October 2035

Certificate number

1590-4365-0622-4506-3053

Property type

Detached house

Total floor area

117 square metres

Rules on letting this property

Properties can be let if they have an energy rating from A to E.

You can read [guidance for landlords on the regulations and exemptions](#).

Energy rating and score

This property's energy rating is E. It has the potential to be C.

[See how to improve this property's energy efficiency](#).

Score	Energy rating	Current	Potential
92+	A		
81-91	B		
69-80	C		71
55-68	D		
39-54	E	45	
21-38	F		
1-20	G		

The graph shows this property's current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

- the average energy rating is D
- the average energy score is 60

Breakdown of property's energy performance

Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

Feature	Description	Rating
Wall	Solid brick, as built, no insulation (assumed)	Very poor
Wall	Cavity wall, as built, insulated (assumed)	Good
Roof	Pitched, 200 mm loft insulation	Good
Roof	Pitched, insulated (assumed)	Good
Roof	Pitched, 250 mm loft insulation	Good
Window	Mostly double glazing	Average
Main heating	Boiler and radiators, oil	Average
Main heating control	Programmer, room thermostat and TRVs	Good
Hot water	From main system	Average
Lighting	Below average lighting efficiency	Poor
Floor	Suspended, no insulation (assumed)	N/A
Floor	Solid, no insulation (assumed)	N/A
Floor	Suspended, limited insulation (assumed)	N/A
Air tightness	(not tested)	N/A
Secondary heating	Room heaters, electric	N/A

Primary energy use

The primary energy use for this property per year is 228 kilowatt hours per square metre (kWh/m²).

► About primary energy use

Smart meters

This property had no smart meters when it was assessed.

Smart meters help you understand your energy use and how you could save money. They may help you access better energy deals.

[Find out how to get a smart meter](#)

How this affects your energy bills

An average household would need to spend £2,324 per year on heating, hot water and lighting in this property. These costs usually make up the majority of your energy bills.

You could save £895 per year if you complete the suggested steps for improving this property's energy rating.

This is based on average costs in 2025 when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

Heating this property

Estimated energy needed in this property is:

- 14,821 kWh per year for heating
- 3,197 kWh per year for hot water

Impact on the environment

This property's environmental impact rating is E. It has the potential to be D.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO₂) they produce each year.

Carbon emissions

An average household produces
6 tonnes of CO₂

This property produces
6.2 tonnes of CO₂

This property's potential production
3.6 tonnes of CO₂

You could improve this property's CO₂ emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

Steps you could take to save energy

► Do I need to follow these steps in order?

Step 1: Internal wall insulation

Typical installation cost

£7,500 - £11,000

Typical yearly saving

£553

Potential rating after completing step 1

Step 2: Floor insulation (suspended floor)

Typical installation cost

£5,000 - £10,000

Typical yearly saving

£81

Potential rating after completing steps 1 and 2

Step 3: Floor insulation (solid floor)

Typical installation cost

£5,000 - £10,000

Typical yearly saving

£48

Potential rating after completing steps 1 to 3

Step 4: Low energy lighting

Typical installation cost

£960 - £1,120

Typical yearly saving

£98

Potential rating after completing steps 1 to 4

Step 5: Replace boiler with new condensing boiler

Typical installation cost

£2,200 - £3,500

Typical yearly saving

£77

Potential rating after completing steps 1 to 5

Step 6: Solar water heating

Typical installation cost

£4,000 - £7,000

Typical yearly saving

£39

Potential rating after completing steps 1 to 6

Step 7: Solar photovoltaic panels, 2.5 kWp

Typical installation cost

£8,000 - £10,000

Typical yearly saving

£296

Potential rating after completing steps 1 to 7

Who to contact about this certificate

Contacting the assessor

If you're unhappy about your property's energy assessment or certificate, you can complain to the assessor who created it.

Assessor's name

Adrian Bunting

Telephone

01206 738294

Email

adrian928@btinternet.com

Contacting the accreditation scheme

If you're still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

Accreditation scheme

Elmhurst Energy Systems Ltd

Assessor's ID

EES/007188

Telephone

01455 883 250

Email

enquiries@elmhurstenergy.co.uk
